Score Sheet for the Rimfire "Mad Minute"

Name / Target #	Out	4	5	6	7	8	9	10	X	Total Points	Total Holes

Recommended Procedure:

(1) Start at the outer locations and work inward. Mark each hole with a pencil as it is counted to avoid double counting. Holes that touch the line are counted with the next higher value. Write the total count for each ring on the scoring ring near the number.

(2) The person holding this score sheet is responsible to verify the total counts written on the target and write them on this score sheet.

(3) "Total Points" is the number of holes at 8 or higher. "Total Holes" tells the shooter how many shots hit the cardboard.

(4) On the standard rimfire target we use, the 8-ring is a 12-inch diameter circle. On the NRA SR-1 target (200 yd reduced to 100 yd) the 8-ring is a 9.35-inch diameter circle.

(5) If another relay will use the targets, they may be patched or have a new target pasted on them -- depending on the number of holes. Otherwise don't patch them.
